

INDIGO GREEN FOUNDATION POLICIES

Subject: Storm Shutters

Date Adopted: January 15th, 2017

Policies:

In order to preserve the esthetic harmony of Indigo Green, the Architectural Committee (the “**AC**”) of the Indigo Green Foundation has determined certain design aspects of storm shutters that it deems necessary. Owners should note the following:

- Storm shutters must be the roll-down type. No corrugated storm shutters or accordion-type shutters shall be allowed.
- Storm shutters must be made of aluminum. No shutters made of metal shall be allowed.
- Storm shutters must be powder-coated in white to match the window frames. Alternatively, if a shutter is located on a wall that is already brown as approved by the AC, such shutter could be the same brown color as the wall.
- The above policies are meant to be a guideline to indicate what may be acceptable, or not to the AC, and does not relieve an Owner from the obligation of applying for approval to the AC prior to installing storm shutters.
